

CANVASBACK

2022 WALLA WALLA VALLEY ROSÉ OF SYRAH

Home to many of the Pacific Northwest's oldest and most acclaimed vineyards, grapes have been grown in Walla Walla Valley since the 1850s. With deep, loamy soils and a climate that features a significant swing between day and nighttime temperatures, Walla Walla Valley offers ideal conditions for growing and producing elegant and beautifully wines with bright acidity.

VINTAGE NOTES

Beginning with an April snowstorm that delayed budbreak but caused no significant damage, the 2022 vintage was marked by its cool nature. While a cold, wet spring helped to saturate the soils, it also delayed flowering until mid-June. Midsummer was mild and temperate, with temperatures finally raising above 90° F in late June, and only 7 days over 100° F throughout summer. As harvest approached, we benefitted from a perfect stretch of warm, dry weather in the high-70s and low-80s. We began harvesting our Syrah on October 10th and concluded with Cabernet Sauvignon on October 25th. The resulting wines show dynamic depth and complexity, supple tannins and lush, varietal flavors.

WINEMAKING NOTES

Bright, round and racy, this Rosé of Syrah draws you in with beautiful aromas of white raspberry, kiwi, cantaloupe and honeydew melon. Though vibrant and energetic on the palate, an underlying creaminess adds length and lusciousness to flavors of tangerine zest, apricot and melon, with hints of flinty minerality emerging on the long finish.

WINEMAKING

APPELLATION	Walla Walla Valley
VINEYARD	Resurgent Vineyard
VARIETAL COMPOSITION	100% Syrah
OAK PROFILE & AGING	Aged 4 months in 100% neutral French oak barrels
ALCOHOL	12.8%
